Author Bio

Dr Toni Lindsay is a qualified clinical psychologist who has been working with both adults and adolescents for over 10 years. She works at Chris O'Brien Lifehouse, a cancer treatment center in Australia, in the Oncology and Haematology departments and has a special interest in the care of adolescents and young adults with cancer. She is an AHPRA approved supervisor and works predominately from an Acceptance and Commitment Therapy framework. Her first book was titled *Cancer, Sex, Drugs and Death* (Australian Academic Press, 2017) and focused on the psychological management of young people with cancer. More recent titles include *The Cancer Companion* and *The Certainty Myth*, published by Exisle Publishing.

During more than fifteen years spent working clinically with adolescents and young adults (primarily in the health context) Dr Lindsay has developed a unique perspective and understanding of the challenges of managing anxiety. She observes, 'Through my clinical practice with young people, anxiety is showing up more and more frequently. It is now rare that I will meet a young person who has not identified that anxiety has been a concern for them in the past.'

The Happiness Trap Cards

50 ACT-Based Prompts, Practices & Reflections to Help You Stop Struggling and Start Living

Dr Russ Harris

THE HAPPINESS TRAP takes its name from a central theme: many popular ideas about happiness are misleading and inaccurate, and may well make you miserable if you let them guide your life. The Happiness Trap offers a radically different but firmly science-based pathway to genuine happiness, via a psychological model called Acceptance and Commitment Therapy (ACT).

The aim of ACT (which is pronounced as the word act, not as the initials A.C.T.) is to maximize human potential for a rich, full, and meaningful life, and there are now over three thousand published scientific studies confirming its effectiveness.

Every card in this deck covers a key ACT concept. On one side, there's a brief summary of the idea and on the other side a practice for applying it in your life. The idea is that you can pull cards out at random to learn about or remind yourself of key ACT principles and then apply them to your everyday life.

Honey Bee Pests and Diseases

A complete guide to prevention and management

Robert Owen, Jean-Pierre Y. Scheerlinck, Mark Stevenson

Honey Bee Pests and Diseases is written by three scientists who are also long-time beekeepers. It provides up-to-date information on the management of honey bee diseases found globally, not just in the U.S., Europe, or Australia. Of particular interest are the explanations of how pathogens affect honey bees. This facet of diseases is usually left out of honey bee disease books.

Written in an easy to understand way, and richly illustrated with photographs and diagrams, chapters cover integrated pest management (IPM), epidemiology, viruses, brood diseases, mites, parasites, as well as other problems a colony might face. The book is largely based on the Ph.D. research of Dr. Robert Owen, who studied the effect of bee diseases in Australia and overseas with particular reference to Varroa. Both Prof. Jean-Pierre Scheerlinck and Prof. Mark Stevenson have extensive and well-recognized experience in honey bee research. The authors of Honey Bee Pests and Diseases have been kept beekeepers for over twenty years, and have a professional interest in bees through their university research. The diseases honey bees currently face can be better managed when beekeepers, eager to learn about the identification and treatment of diseases, have access to the latest information. Beekeeping techniques vary in different countries, and this book enables beekeepers to take the best from each country's practices.

The Road to Pangaea

In search of the lost supercontinent

Bill Morris

An immersive and fascinating journey into deep time, charting the ancient supercontinent of Pangea through a billion years of Earth's history.

'Pangaea' is a mystery of geological history; a lost supercontinent and a place woven into the consciousness of all who inhabit its scattered fragments. But what was life like when it was whole? *The Road to Pangaea* traces the steps science took to find Pangaea, and the evolutionary journey of the supercontinent itself. Our tour guide on this journey is *Glossopteris* – an extinct tree that dominated the supercontinent for 50 million years, before vanishing in the most devastating event ever to strike life on this planet, the Permian mass extinction. This is a story about deep time and the challenges that face those who venture there. It's about the importance of imagination in science, and the reasons that the journey towards understanding is sometimes more important than the destination.

The Chronic Pain Couple

How to be a joyful partner & have a remarkable relationship in spite of chronic pain

Karra Eloff

The struggle to maintain joy & a fulfilling relationship while coping with chronic illness and pain is a serious problem for millions of people. Australian entrepreneur and health professional Karra Eloff draws on academic research and her own pursuit of joy in spite of suffering to bring this trailblazing, compassionate, low-energy and practical path to a remarkable new normal, for you and your chosen human/partner.

On average, one in five adults suffer from chronic pain. In older people, the number rises to three in five. Most of these people don't realise they don't have to settle for a survival-based coexistence with their partner or bury their hopes for success and joy under a mountain of heat packs or duvets. Chronic illness or pain, according to Karra, need not hold you back from experiencing personal joy and success. It is possible to forge a path to remarkable—to move the dial of a relationship challenged with chronic pain from embattled and exhausted to joyful and passion-filled.

All or Nothing

Bringing balance to the achievement-oriented personality

Mike McKinney

High achievers are often praised for their dedication, determination and drive. Indeed, a single-minded approach can be viewed as the only way to succeed. But what if the cost of that success becomes too great? what if you feel as if your life is spiralling out of balance? The 'all or nothing' personality-style - one that is driven to focus on one task or area of life to the exclusion of al else - might be the cause. This can sometimes lead to burn-out, mental and physical fatigue, or health and relationship issues. So what's the solution?
